

LARP Character Tracker

Website Project Page For Viewing Character
Statsitics for a Live-Action Role-Playing Game

By David Henry

The Problem

Tracking information on a player's character(s) is done via paperwork/honour system.

The Solution

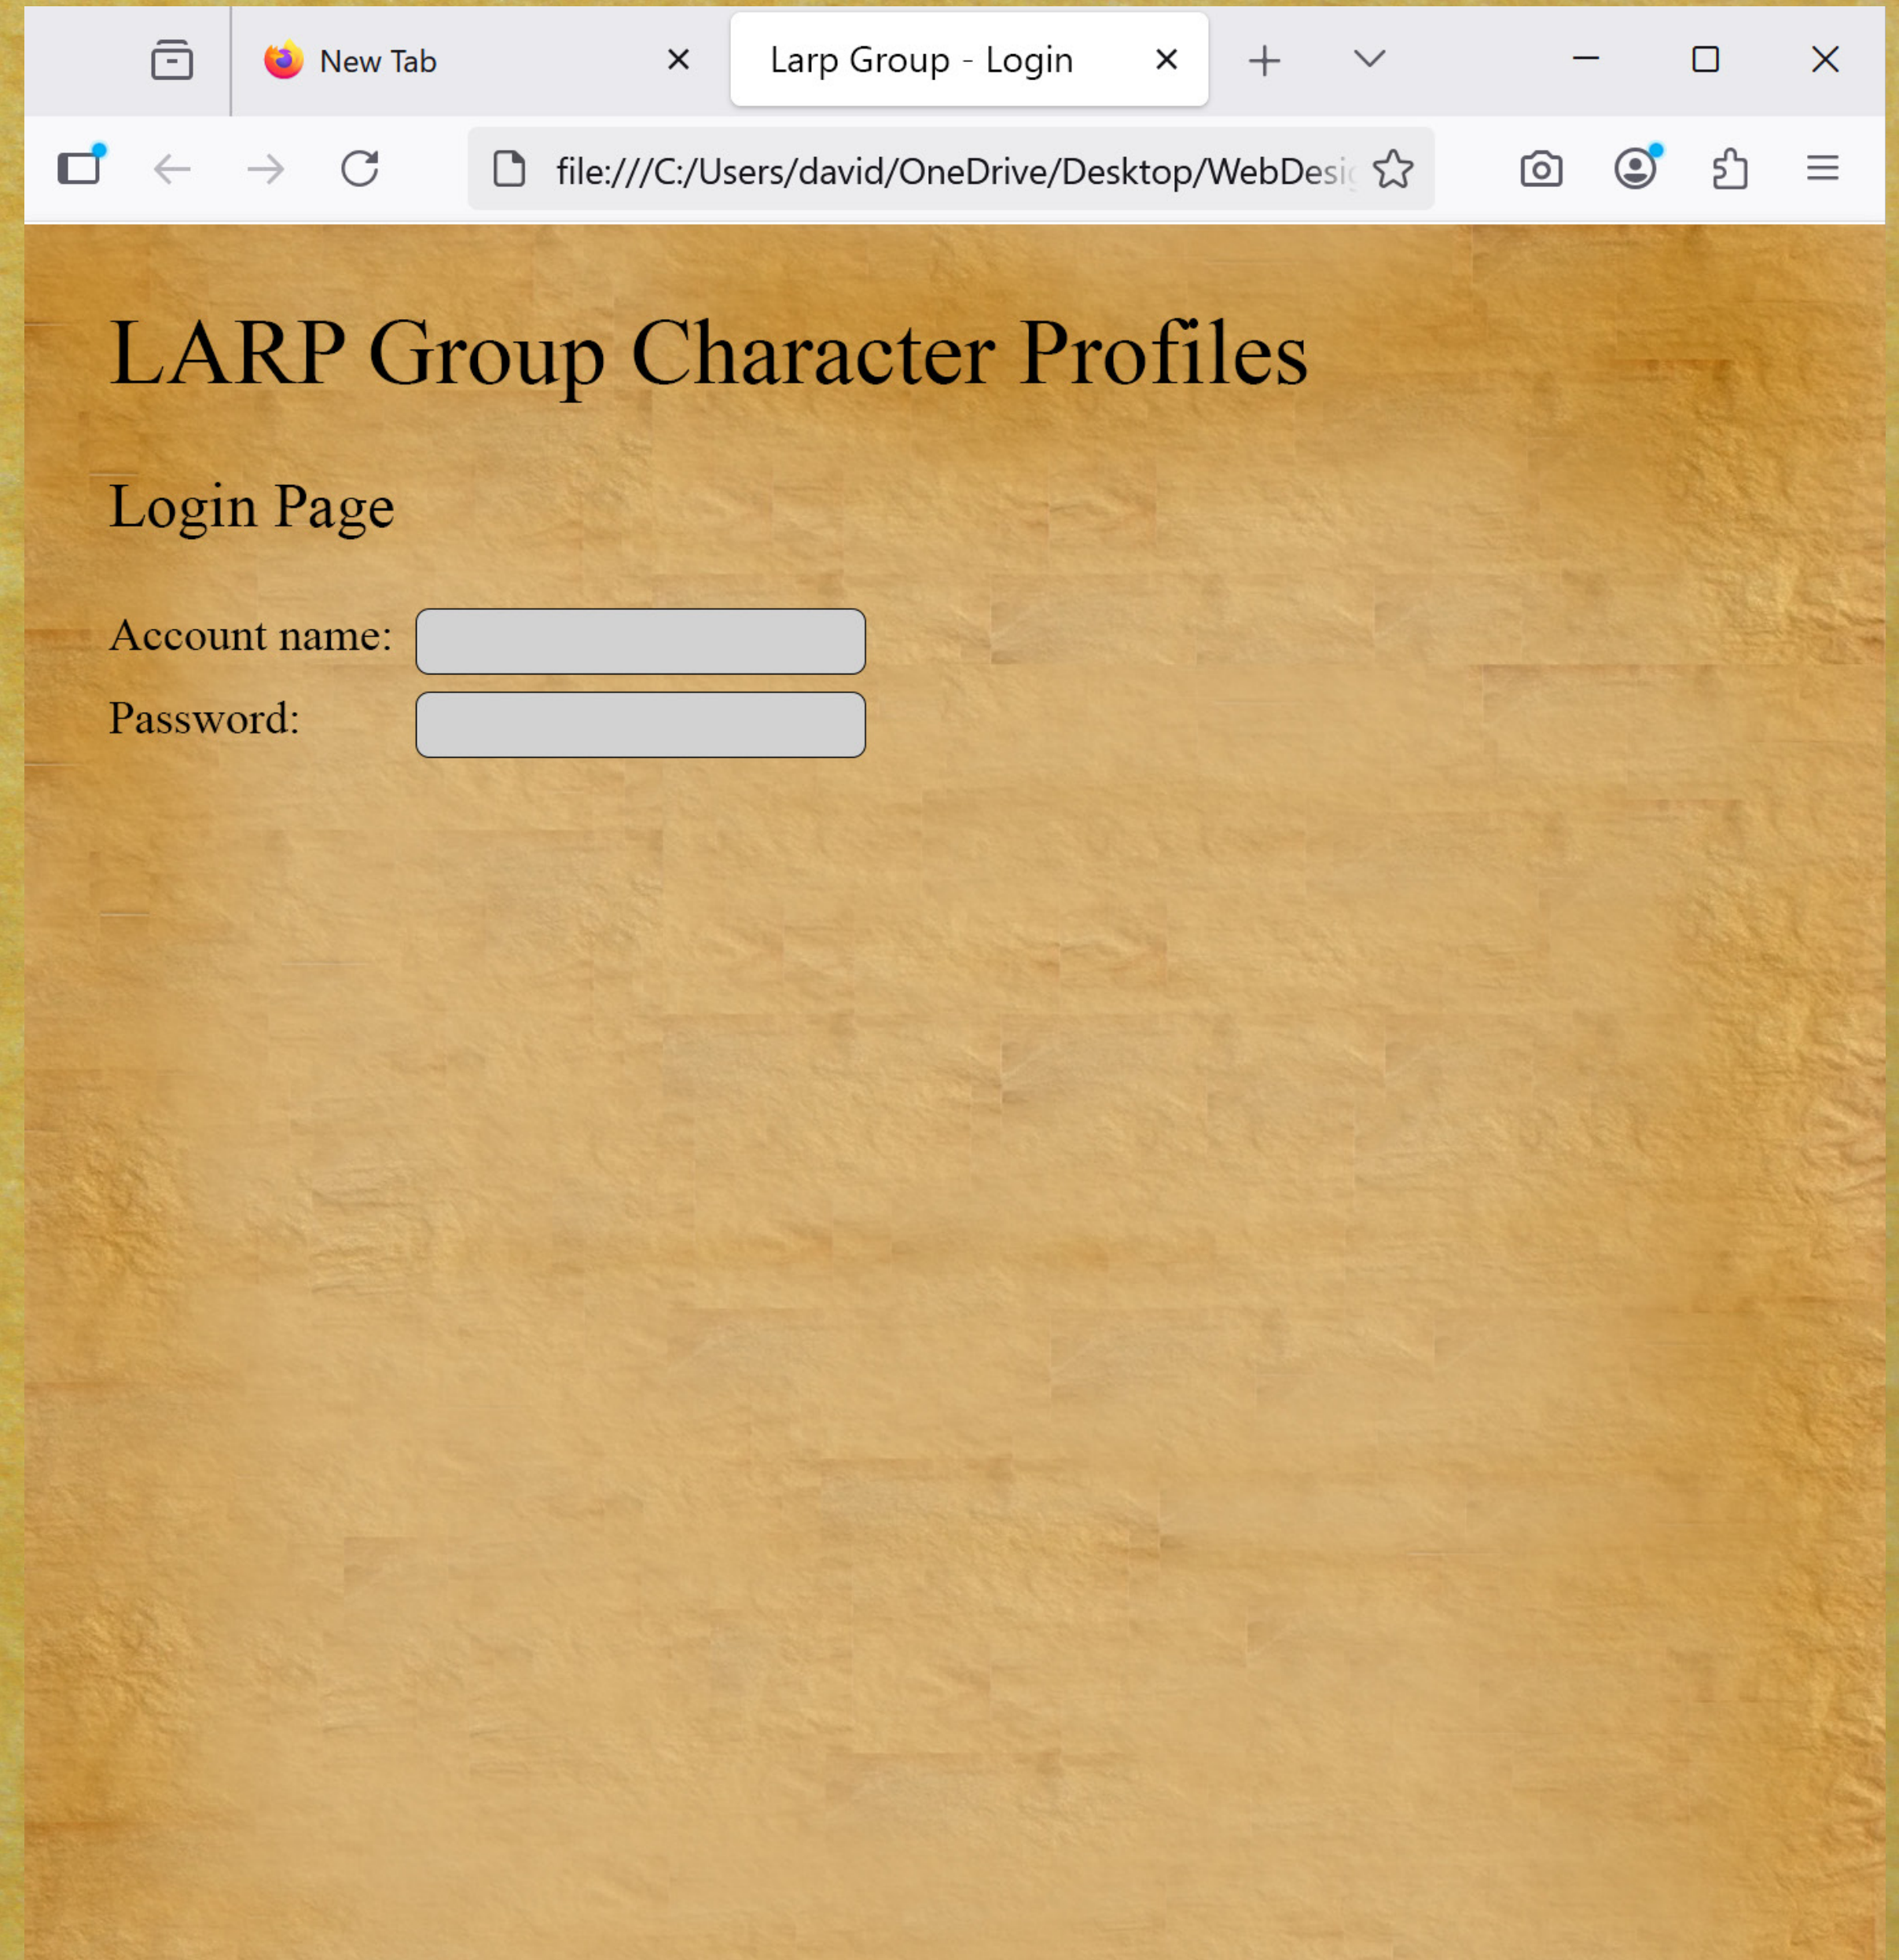

Create a website where players can see and have their character(s) statistics tracked and viewed by themselves and by the LARP owners.

Part 1 - Login Page

Players Login with a Username and Password

- Optionally, they can create a profile if they don't have one

Once a Player logs in, they can view the profiles of their characters if they exist in the system

The screenshot shows a web browser window with two tabs: 'New Tab' and 'Larp Group - Login'. The address bar displays a file path: 'file:///C:/Users/david/OneDrive/Desktop/WebDesign...'. The page content is on a textured, light brown background. At the top, the title 'LARP Group Character Profiles' is centered in a large, black, serif font. Below it, the text 'Login Page' is centered in a smaller, black, serif font. Further down, there are two labels: 'Account name:' and 'Password:', each followed by a light blue rectangular input field. The 'Account name:' label is positioned to the left of the first input field, and the 'Password:' label is positioned to the left of the second input field.

Part 2 - Character Sheets

Once Players have logged in to their account, they can view their character's status, such as skill, level, date of creation, and last event they played that character.

New Tab

Larp Group - Login
